

Point of Sale Solutions for Every Business Application

USRobotics modems are ideal for PoS and Data Capture solutions: security, quality, and reliability from a name you can trust.

- Dial-up modems are **cheaper to install and maintain** over long periods of time. Smaller businesses can save money but still offer credit card transactions without the additional cost or need to install pricey ethernet or broadband connections.
- Most **transaction needs are minimal** - the majority of most PoS systems only require 2.4 Kbps transfer speeds - our 33.6 Kbps modem offers 14 times the speed needed.
- Communication on demand offers **better security** than the “always on” broadband connections, reducing the threat of hacking or security breaches.
- **Multiple form factors** allow USRobotics modems to be implemented into just about any system: Courier Business Modem for high end complex systems, Internal Low Profile for embedded solutions and terminals, and the USB Controller modem for situations where space is an issue.
- Supported equipment includes cash registers, lottery machines, credit/debit card verification, and more.

USRobotics Modems - Ensure security and reliability in Point of Sale and Data Capture applications.

Product	Part Number	Form Factor	Type/OS	Product Applications	Product Description
Low Profile 56K PCI Faxmodem Bulk Pack 	USR2980-OEM	Low Profile, Standard* PCI Internal 3.3V and 5V	Controller 	Point of Sale Dialup Internet Broadband Backup Data Capture	ONLY low profile controller based internal modem! Bulk Pack† *Standard PCI bracket in box
56K USB Faxmodem 	USR5637	USB External	Controller 	Dialup Internet Broadband Backup Point of Sale Data Capture	Small and light, perfect laptop accessory. No Power supply needed.
56K V.92 External Faxmodem 	USR5686G	Serial External	Controller 	Point of Sale Dialup Internet Broadband Backup Data Capture	Ideal external for Windows and Linux, firmware upgradeable.
Courier 56K V.92 Business Modem 	USR3453C	Serial External	Controller 	Point of Sale Out of Band Connections Server Maintenance & Monitoring	Approved for use in over 100 countries, Remote management, Dial and Dialback Security.
56K V.92 PCI Express Faxmodem 	USR5638	PCI-e Internal	Controller-less 	Dialup Internet Broadband Backup Point of Sale Data Capture	Common driver across multiple Operating Systems, fits into any PCI Express slot.

- Universally available network connections
- Wide variety of compatible equipment
- Flexible interfaces (USB, Serial, PCI, PCI-e)
