

USR8401
2-Port USB 3.0
ExpressCard

- 2 USB 3.0 slots
- ExpressCard fits any slot size
- Great for laptops

USR8402
2-Port USB 3.0 PCI
Express Card

- 2 USB 3.0 slots
- Great for desktops
- Powered USB Ports

USR8400
4-Port USB 3.0 Hub

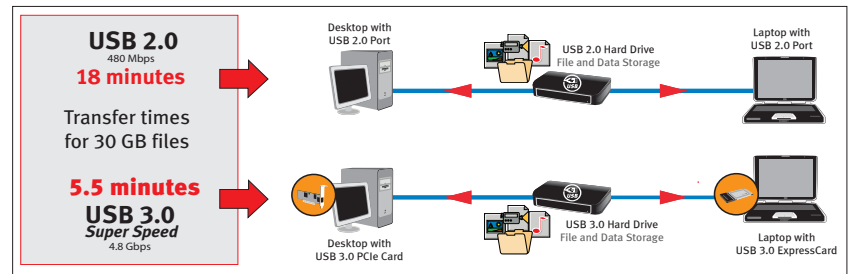

- 4 USB 3.0 slots
- Expand 3.0 capabilities
- Charge more USB devices

Take advantage of **faster USB** transfer speeds!

Do you keep your digital data on external hard drives? Transfer photos and video from card adapters or directly from the device? If you do, odds are good you've noticed how long it takes to write large amounts of data to the new location. With the new USB 3.0 adapters and hub accompanied by a 3.0 hard drive or device, transfer speeds can be as much as **10 times** faster making those transfers fly -- saving you time.

USB 3.0
SuperSpeed

Upgrading is worry free, USB 3.0 is backward compatible so you can still use your USB 2.0/1.1 devices with the 3.0 cables and ports. Upgrading to USB 3.0 cables and hubs prepares you for all future devices as they transition - printers, digital cameras, video cameras, and just about any USB device.

Why USB 3.0?

- Transfer mass amounts of photos, videos, files up to 10 times faster
- New power management - increased power for charging or running high power devices
- Supports Plug and Play functionality
- Manufacturers will be transitioning USB devices to 3.0
- All USB 3.0 adapters/hubs are backward compatible with USB 2.0 and 1.1

Compatible products

- 3.0 External hard drives - store your files faster
- 3.0 Flash drives - for those quick backups, now even faster
- Select laptops with built in 3.0 ports - expand the number of 3.0 ports with a hub
- More products on the horizon

USR USB 3.0 - faster transfers means more time for YOU.
